

DREISTERN PROJECT MANAGEMENT - SAFETY GUARANTEED

Complex projects require a **professional coordination of all project participants**. Our project managers are an integral part of the Dreistern branch teams and work on your requirements starting in the inquiry phase.

This ensures, from the beginning, that potential **risks are identified early** on and that **feasibility is secured**.

The technically qualified design of the concept and the actual structure of your system is ensured by internal risk gates, 8-D reports and regularly held lesson-learned meetings.

Project monitoring is ensured by defined control loops. The resulting dynamic retains **fast reaction times**.

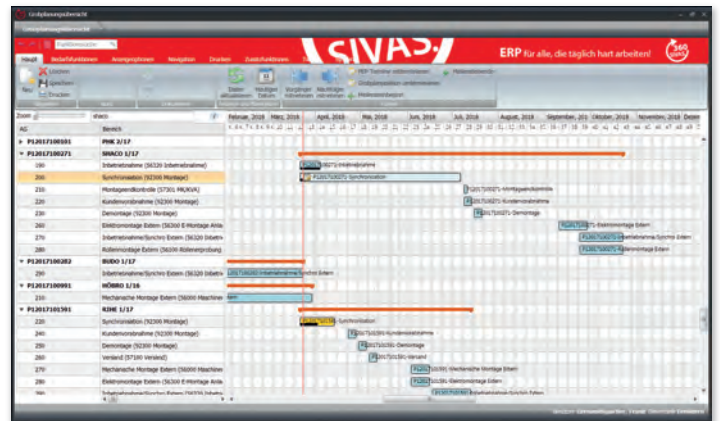

DREISTERN project manager ...

- are excellent specialists with many years of experience
- understand the processes and know the needs of the industry
- make a significant contribution to the success of your projects
- know the interfaces and their contact persons
- are your direct and trusting contact persons for all matters
- accompany you until the final acceptance of your unit in your factory

DREISTERN PROJECT MANAGEMENT - SAFETY GUARANTEED

From project start to the final acceptance at your factory, deadlines and individual milestones are permanently kept transparent by the project managers. With the support of capacity checks, measures are taken to ensure compliance.

The DREISTERN project management accompanies the **examination of the machine capability** on the basis of jointly defined parameters before delivery in detail. This quality criteria offers **maximum security** for the subsequent production in your factory even **before delivery**.

Specified control features and status reports ensure **optimal project transparency** during the project period. Not only the required documents will be checked, but also assembled components are thoroughly examined and documented in a **final inspection**.

By carefully **examining and planning** external installation periods, you have the opportunity to plan the integration of other trades actively and check the work progress. This greatly simplifies customer provision during this period.
