# DREISTERN SERVICES 4.0

Consistently successful at all times – we'll take care of that!

## The specialist for your roll forming technologies

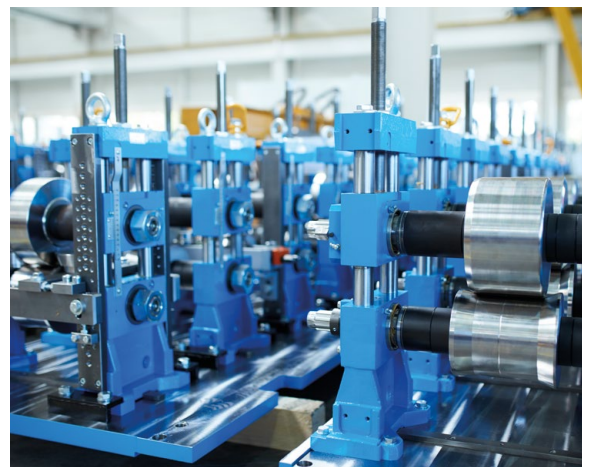

Ever since it was founded in 1949, DREISTERN GmbH & Co. KG has always set exceptional standards in the field of roll forming. We have established ourselves as one of the market leaders worldwide through the application of the very latest technologies in roll forming lines, our comprehensive know-how concerning roll forming procedures, and our ability to provide complete process integration. More than 2,000 units from DREISTERN are in use, producing more than 10,000 different profiles, more than 40 patents have already been applied for.

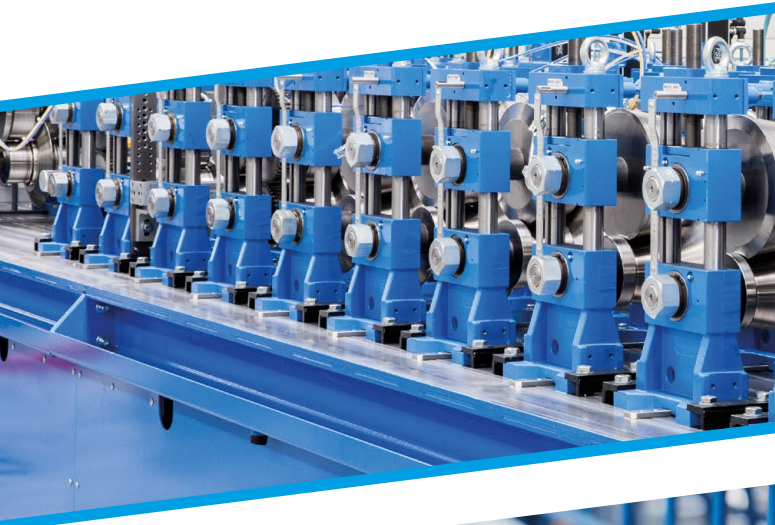

## We work for companies from these sectors, among others

- Automotive & transport
- Electrical industry
- Construction industry
- Storage & logistics
- Furniture industry
- Roll forming plants

SERVICES4.0

Our services ensure long-term, efficient production for you and your roll forming line. We are ready when it comes to **REPLACING** wearing parts quickly and with our unique original components of the highest quality. We can **RETROFIT** any necessary adaptations or extensions to your roll forming line according to your requirements. **MODERNISING** your line in a targeted manner with one eye on tomorrow's requirements helps to secure your production going forward. In day-to-day business, our **SERVICE** ensures that downtimes are reduced to a minimum. Our goal is to shape your success together at the highest level!

## DREISTERN*Care*

### INTELLIGENTLY COORDINATED SERVICES

**DREISTERN*Care*** includes the relevant points such as inspection, maintenance, training, wear and spare parts packages, as well as our HelpDesk – a carefree package that keeps your production running.

#### REPLACE

Our fast supply of **express rolls** and **spare components** enables you to reduce the downtime of your roll forming line to a minimum.

We offer you the complete range of components as **original parts** from a single source – in the desired quality and a level of availability that only the manufacturer can promise you.

#### MODERNISE

Intensive use of your roll forming line can impair the original quality of your products after a long period, usually due to wear and tear.

Modernising your roll forming line or individual assemblies – such as the **control system** or the **roller sets**, up to and including the **machine safety** – are decisive measures that we recommend and are happy to discuss with you. With the help of our expertise and targeted modernisation measures, you will regain your products' precision and extend the service life of your roll forming line.

#### REFRESH

Requirements and needs are constantly changing. Therefore, retrofitting may not only make sense, but may even be mandatory.

It is up to you to decide whether, for example, the core of a roll forming line – the **roll forming tool** – or a new or additional **separating unit** is required. A general **line extension** or the **integration of a technical innovation** is always helpful in pursuing the goal of achieving efficient and future-proof production.

#### SERVICES

Service at Dreistern stands for value-enhancing services such as **inspection, maintenance, training & education** or fast **HelpDesk services**. For example, with the help of our **Remote Support**, we are directly on site at your place of business around the world, in order to be able to jointly search for the cause of a fault. With our service offers, we always maintain your system's productivity at the highest level.

If necessary, we will coordinate a planned line shutdown for you at the appropriate time. In this way, you will not incur unnecessary costs for the rapid replacement of complete assemblies. And, of course, we ensure the fast and professional repair of all affected components.
